## Global Trade Content

### **Let's Start the Conversation**

Global Trade makes the world go round. Managing cross border trade requires insight into both tariff and non-tariff barriers. Which licenses are required to import or export? Is the buyer someone we can do business with? What duties and taxes will apply and what are the rates? Are lower rates available and how do you qualify for application of these lower rates? Which documents are needed to satisfy the authorities, the buyer, and the revenue services? Can an inspection of goods be expected? Global Trade Content answers all of these questions. Access to up to date, accurate, logically sorted, and easily accessible Trade Content allows our clients to be better informed, make better decisions, and know what to expect when importing and exporting.

### **Tradebeam Global Trade Content**

For over a decade, TradeBeam has collected Global Trade Content. A wide variety of Trade Content has always been a part of our collection process. With the ever growing need for Trade Content in order to be better prepared for international trade and to make more informed decisions, TradeBeam is committed to offering clients a wide range of Trade Content and ensuring the Trade Content is up to date and accurate.

Our Global Trade Content team checks all relevant developments, updates content continuously, anticipates updates and new legislation and sources Trade Content from over 2,000 sources. Sources include a large variety of government publications, but also industry sources, standardization organizations and many more.

### **Format and Delivery**

Access to TradeBeam's Global Trade Content is available through different methodologies. Our own Global Trade Management applications use the Trade Content (for example for landed cost calculation, Restricted Party Screening, or document

generation modules) but the content can also be accessed through individual queries, or buy subscription ('content only'). Not all Trade Content has to be purchased, Avolin is excited to work with clients to create a tailor made package (based on clients' product line, countries in which it is doing business, type of Trade Content needed, etc.) to create the perfect set of Trade Content. Our delivery formats include XML, Excel, Access, etc. and we provide the data to the customer through various methodologies (email, XML, sFTP, etc.).

## Updates

TradeBeam updates Trade Content, including regular and preferential duty rates, on an ongoing basis (i.e. we update as the authorities update). Our clients can obtain these updates as they become available or on a periodic basis.

## Example

For example, Trade Content can be used to identify the different duty rates that apply when importing t-shirts into Argentina. An example of the query and results is given below:

## More Trade Content

TradeBeam collects Trade Content for more than 150 countries and we continuously expand our coverage, for both countries and Trade Content types. The collected Trade Content spans a wide variety of data, including (but not limited to) classification trees (HS and ECCN based) in various languages, import and export license requirements, OGA information, document requirements, other duties and taxes such as VAT, Sales Tax, excise, and additional (in-)direct taxes, Restricted Party data, Rules of Origin, and customs exchange rates.
