# What's New in Saratoga 7.3?

We've made a number of enhancements to ensure the Mobile Client is the most secure version ever. Whether you're at a customer meeting, waiting for a plane or grabbing a coffee, you can be sure you're accessing your data in a secure environment.

You can now do even more with your data in the Mobile Client with faster access to the information you need, wherever you are. You can open records after drilling down to them in your reports, view attachments without having to save them to your device, and we've also made the search experience more customizable.

We've improved the way Saratoga integrates with other systems using web services, providing more information about the status of the integration as well as any errors that might have resulted to give you a clearer picture and assist in any troubleshooting to streamline your integrations.

Are you a Saratoga administrator? It's now even easier to roll out changes to Saratoga across your company network. Simply deploy the rich client configuration file from a single file location, saving valuable time and allowing you to change and update the configuration much more easily.

Sending records to your colleagues is now even easier in Saratoga Rich Client 7.3. If you prefer to send PDFs directly out of Saratoga Rich Client, the system will now remember this is your preference and you won't have to reselect it every time. Records can also be sent as email attachments from a grid to your colleagues, so you know they're getting the most up-to-date data directly from your system as quickly as possible.

To learn more about Saratoga 7.3, ask your Account Manager or contact us at info@avolin.com. We're looking forward to helping you on the road to true CRM efficiency.
