

Avolin

E-commerce & Retail Solutions

Avolin's e-commerce & retail solutions create an end-to-end platform to connect online and physical business models for greater visibility and efficiency. Through combining capabilities which allow retailers to make product recommendations and deliver a high degree of personalization in their e-tailing with multichannel inventory management, retailers will be better positioned than ever to maximize sales, optimize product ranges and create the ideal stock position for their entire retail model.

E-Commerce & Retail

Search and Discovery

SLI is a platform of tools for e-commerce websites that generate more traffic, convert more shoppers into buyers and maximize order values.

Customer Engagement

MyAlerts delivers 100% relevant content based on change events on your website to drive 10x higher engagement with your customers.

Location Data

Placeable drives online and offline revenue through location data management, local marketing, and digital advertising.

Inventory Management

Inventory Management

Vision is an inventory management solution that helps manufacturers, distributors and retailers maximize retail supply chain profitability.

Supply Chain Visibility

Prologic gives organizations control and visibility over their entire business, from sourcing and warehousing through to retail and wholesale sales.
