SLI Learning Search Connect for Magento Enterprise

Powering Your Magento Store with Relevant Site Search

SLI Systems has developed SLI Learning Search Connect to provide the power of its full-service, learning based site search to retail clients using the Magento e-commerce platform.

SLI's Learning Search Connect™ extension integrates with Magento to provide an outstanding level of search with default settings appropriate for most online retailers. Learning Search Connect ensures that the combined use of Magento and SLI becomes seamless and easy to implement. Using Learning Search Connect extends the Magento admin console to include SLI data feed configuration. Enabling the module in the admin console will replace the Magento built-in catalog search with SLI's award winning Learning Search™.

Key Benefits

- Improved e-commerce sales
- Fast generation of feeds
- Seamless integration
- Rapid implementation
- Low internal resource involvement
- Custom modifications to search results

Learning Search Connect is a downloadable Magento extension, available through the Magento Connect Marketplace. It is compatible with all versions of Magento Enterprise EE 1.10+. Learning Search Connect automatically generates a data feed from Magento and sends it to SLI via FTP. No manual intervention is required post initial implementation. SLI indexes the full catalogue of online product data and content, and creates custom search results pages that are consistent with your retail site's look and feel. Several Magento e-commerce platform customers use SLI's standard full-service site search solution, including Eastwood, Ghirardelli Chocolate and Carolina Rustica.

With powerful features such as dynamic merchandising, Rich Auto Complete, AJAX and learning SEO, SLI significantly improves the user experience of any retail site. SLI Learning Search™ helps site visitors find what they want to buy quickly and easily, which drives increased sales and greater customer loyalty.

Cloud Service Done Right

SLI offers a highly redundant architecture that helps protect you from hardware or other service failures. This costs you nothing and is part of our effort to continuously offer the best service possible. Furthermore, as a hosted service we can readily scale to meet the needs of your site during peak shopping seasons.

Avolin

Avolin brings the power of cloud transformation to thousands of organizations around the world. Our strategy is to create a seamless journey to the cloud that can meet our customer's individual business and risk requirements.
