Next Generation Support for SLI Systems

Customer success is our #1 objective, and that's why we've improved our support model to ensure you maximize the value you achieve from your SLI Systems solution. We know one size doesn't fit all – we have expanded our support program to offer several options so you can select the tier which maximizes value for your business. Most importantly, all of our support tiers now include the Avolin Prime program, which provides low to no cost access to a carefully selected range of additional solutions that can help you scale your business, launch new initiatives and reduce technology expenses.

Platinum

The complete concierge-level support package to help you get the maximum value from SLI Systems.

Gold

An advanced support structure with a range of benefits to help meet your needs quickly.

Standard

A foundation that allows you to raise tickets with our support team for occasional assistance.

To get in touch with Avolin and talk more about Premier Support, please email info@avolin.com.

Platinum

Avolin's Platinum Premier Support tier is the preferred option for customers that want to get the most from their SLI Systems solution. With Platinum, you'll receive industry-leading assistance from Avolin's teams and a range of exclusive benefits including free implementation of our MyAlerts e-commerce alerting solution, more regular touchpoints with us and meetings with the Avolin executive team.

You will have complete access to the full support suite whenever you need it, keeping your critical systems finely tuned to work even harder for your business. All delivered with clear pricing predictability over the term of your agreement with us.

Why Choose Platinum?

An Enhanced Customer Success Experience:

Your Customer Success Manager will be your champion at Avolin. They will help you fine tune your SLI Systems solution to drive the most value, provide business reviews and present key insights to help your solution align to your overarching business objectives.

Additional Value Through Managed Services:

Through our managed services, we offer technical audits to make sure your SLI Systems solution can handle even the busiest of seasons, as well as performing healthchecks, site re-platforming and re-design, and implementing up to four additional SLI Systems modules at zero cost.

MyAlerts Implementation:

The Avolin Professional Services team will implement MyAlerts on your website. MyAlerts is an e-commerce alerting tool that lets your customers sign up for notifications about things they want - like price drop or back in stock emails - so they return to buy from you. And because you know who is signing up for alerts and what they're signing up for, you can tailor your marketing messaging to them so they're more likely to read your emails and make a purchase as a result.

Avolin Prime:

Avolin Prime gives you access to more software for less cost. Simply by becoming a Premier Support customer you have access to a growing library of extra software solutions you can start using - and we give you the licenses absolutely free.

Take a look at the [Avolin Prime](#) page for the latest list of solutions available to you.
